FIRST EDITION

AF 9200 SUPPORTING DOCUMENT

Aerospace Federation
af.org

Document identity and use

Field	Declared position
Code	AF-WI-9200-009
Title	Verify corrective-action effectiveness
Family	Work Instructions
Organization	Aerospace Federation
Edition	FIRST EDITION
Relationship	Supporting material for AF 9200 - Aerospace Safety & Operational Assurance
Status	Prepared for publisher review; approval and effective dates not assigned
Language	English master text

Use and precedence

The AF 9200 standard contains the proposed requirements. This supporting document supplies guidance, model controls or records within its stated purpose. Complete the local scope, parameters, roles and authority before operational use. A completed template does not establish conformity or permission.

Applicable legal and competent-authority obligations remain independently binding. No AF recognition, accreditation, statutory approval or operational authorization is created by this document. Codes in this set are proposed identifiers for the newly prepared supporting collection.

Record completion

Where fillable fields are provided, use a PDF reader that supports interactive forms. Blank fields remain unresolved. Attach controlled evidence by identifier where space is insufficient. Typed names are not certificate-based digital signatures. Preserve the completed record and its history under the local retention rules.

Implementation control	Allocation
Responsible function	Authorized task performer
Primary AF 9200 anchors	15-16; Annex Q
Catalogue	AF-ML-9200-001; coverage: AF-CM-9200-001

1 Purpose and use

These instructions support competent personnel performing defined assurance tasks. They do not replace aircraft, equipment, mission, hazardous-energy or emergency technical instructions. Complete local references and authority in the profile. If the instruction conflicts with an applicable mandatory condition, stop the affected task and escalate.

2 Verify corrective-action effectiveness

AF 9200 references: 15-16; Annex Q.

Before starting

Cause, action, implementation evidence and predefined effectiveness test.

Table WI09-1. Task steps

Step	Action
1	Confirm the action addresses the identified causal condition.
2	Verify actual implementation for the affected population.
3	Apply the effectiveness criterion over the required conditions or observation period.
4	Record result, remaining restrictions and eligible closure.

Decision control: Keep effectiveness pending if only a procedure or training record exists and operational performance has not been demonstrated.

Record the result

Record the actual object, configuration, time, performer, evidence, result and any limitation. Link the task to the applicable hazard, requirement or release. An incomplete task remains visible for the next responsible person.

Local instruction reference / authorized role / required tools or systems

Execution record ID / result / exception / escalation

Performer / reviewer where required / date
