Safety and operational accountability Policy

Space / Aviation / Defense

FIRST EDITION

AF 9200 SUPPORTING DOCUMENT

Document identity and use

Field	Declared position
Code	AF-PL-9200-001
Title	Safety and operational accountability Policy
Family	Policies
Organization	Aerospace Federation
Edition	FIRST EDITION
Relationship	Supporting material for AF 9200 - Aerospace Safety & Operational Assurance
Status	Prepared for publisher review; approval and effective dates not assigned
Language	English master text

Use and precedence

The AF 9200 standard contains the proposed requirements. This supporting document supplies guidance, model controls or records within its stated purpose. Complete the local scope, parameters, roles and authority before operational use. A completed template does not establish conformity or permission.

Applicable legal and competent-authority obligations remain independently binding. No AF recognition, accreditation, statutory approval or operational authorization is created by this document. Codes in this set are proposed identifiers for the newly prepared supporting collection.

Record completion

Where fillable fields are provided, use a PDF reader that supports interactive forms. Blank fields remain unresolved. Attach controlled evidence by identifier where space is insufficient. Typed names are not certificate-based digital signatures. Preserve the completed record and its history under the local retention rules.

Implementation control	Allocation
Responsible function	Accountable executive
Primary AF 9200 anchors	5, 6, 12, 16
Catalogue	AF-ML-9200-001; coverage: AF-CM-9200-001

1 Purpose and use

This model policy supports AF 9200 Clauses 5, 8, 10-16, 25 and 27-28. It is a model for local adoption. The organization shall identify its legal entity, accountable executive, scope, communication routes and effective local approval before applying the policies. No individual appointment or approval is pre-entered.

The policies apply to employees, contracted personnel and participating suppliers within the organization's authority and agreements. Applicable legal duties and competent-authority requirements remain independently binding. Conflicts are escalated rather than silently resolved by a lower-level procedure.

2 Policy commitments

The organization commits to controlling safety risk through defined objectives, competent people, effective barriers, valid evidence and accountable decisions. Operational continuity and commercial delivery shall not override an applicable mandatory safety condition.

The accountable executive provides resources and resolves systemic conflicts. Technical authorities define and defend the technical basis. Operational authorities verify actual readiness and retain responsibility for bounded release. Delegation shall be explicit and shall not remove retained accountability.

Personnel shall have a usable route to raise concerns and request protective action. The organization shall act on credible safety information without waiting for an accident or a scheduled review. Performance objectives shall include control effectiveness and exposure, not merely low reported event counts.

Table PL-1. Implementation and monitoring

Control	Evidence
Authority	Current role and delegation schedule
Resources	Capacity decisions and resolution of critical shortages
Protective action	Recorded stops, restrictions and independent restart reviews
Objectives	Indicators linked to hazards and barriers
Review	Management decisions and verified effectiveness

3 Local adoption and review

Organization and scope

Accountable executive and delegated authorities

Local policy baseline and approval record
