

AF-SC-9200-007

Publication, profile and record-maintenance schedule

Space / Aviation / Defense

FIRST EDITION

AF 9200 SUPPORTING DOCUMENT

Document identity and use

Field	Declared position
Code	AF-SC-9200-007
Title	Publication, profile and record-maintenance schedule
Family	Schedules
Organization	Aerospace Federation
Edition	FIRST EDITION
Relationship	Supporting material for AF 9200 - Aerospace Safety & Operational Assurance
Status	Prepared for publisher review; approval and effective dates not assigned
Language	English master text

Use and precedence

The AF 9200 standard contains the proposed requirements. This supporting document supplies guidance, model controls or records within its stated purpose. Complete the local scope, parameters, roles and authority before operational use. A completed template does not establish conformity or permission.

Applicable legal and competent-authority obligations remain independently binding. No AF recognition, accreditation, statutory approval or operational authorization is created by this document. Codes in this set are proposed identifiers for the newly prepared supporting collection.

Record completion

Where fillable fields are provided, use a PDF reader that supports interactive forms. Blank fields remain unresolved. Attach controlled evidence by identifier where space is insufficient. Typed names are not certificate-based digital signatures. Preserve the completed record and its history under the local retention rules.

Implementation control	Allocation
Responsible function	Assigned schedule owner
Primary AF 9200 anchors	27; Annexes B, N, Y
Catalogue	AF-ML-9200-001; coverage: AF-CM-9200-001

1 Purpose and use

These schedules convert approved criteria into assigned work. They contain no universal default deadlines. The local profile must supply intervals, units, technical bases, start events, recipients and escalation. A missing deadline is an unresolved control, not permission to delay indefinitely.

Review schedules against actual exposure and change. When a deadline is missed, assess the dependent safety decisions immediately and record protection. Extensions require eligible authority and a valid technical basis; they do not occur automatically.

2 Publication, profile and record-maintenance schedule

Track document maintenance, profile validity, retention, backup recovery tests and authorized disposal. Do not invent publication approval dates.

Schedule owner / scope / profile parameters / time basis

Approval and rules for overdue items or changed conditions

Document / record	Review basis	Owner / authority	Due / trigger	Outcome / history

Review, exceptions, protective actions and next update
