Interoperability and Partner Compatibility Reviews

Space / Aviation / Defense

FIRST EDITION

AF 9600 SUPPORTING DOCUMENT

Document identity and use

FIRST EDITION MANUSCRIPT - Prepared for Aerospace Federation review

Field	Controlled identity
Document	AF-SC-9600-004 - Interoperability and Partner Compatibility Reviews
Parent standard	AF 9600 - Artificial Intelligence, Autonomous Systems & Interoperability
Edition / language	FIRST EDITION / English master text
Family	Schedules
Primary source anchors	23-27; Annexes H-I
Suggested local owner	Schedule owner and relevant technical authority
Authority	Publisher approval and effective date are not assigned. Local use requires authorized adoption and completed parameters.

Use with the main standard

This document implements the identified AF 9600 clauses and annexes. Read the complete applicable requirements in the main standard. The source anchors are navigation references; a template does not replace technical judgement, evidence, permission or eligible approval.

AF-ML-9600-001 lists the complete supporting set. AF-CM-9600-001 maps the main clauses and annexes to working documents. AF-TP-9600-001 establishes the common local parameter baseline; add the relevant discipline profiles.

Record control

Identify the object, configuration, record owner and dates. Reference attachments by stable identifier and version. Keep superseded evidence and decisions traceable. Use the approved local retention, access and authentication arrangements. No technical limit, numerical limit, interval or acceptance value is assigned by a blank template.

Interactive record: Complete the fields in a PDF reader that supports AcroForms. Save a working copy and verify that entries remain visible after reopening. Link controlled continuation sheets when space is insufficient; every row requires its own evidence and disposition. Typed names identify people but are not self-authenticating signatures.

1 Approved schedule basis

Enter programme-specific dates, intervals and event triggers from the approved basis. The template imposes no universal duration. Identify dependencies and no-go conditions. A planned date does not establish readiness or permit a decision.

Schedule ID, owner, scope/configuration, sheet number, date/time convention

Approved interval or deadline basis; risk factors; event triggers; authority

Contract / peers	Combination / scenario	Owner / interval	Change / dependency	Result / restriction

Overdue or changed activities, blocked scope, rescheduling rationale and eligible approval
