

AF-TP-9200-007

Design, manufacturing and test profile

Space / Aviation / Defense

FIRST EDITION

AF 9200 SUPPORTING DOCUMENT

Document identity and use

Field	Declared position
Code	AF-TP-9200-007
Title	Design, manufacturing and test profile
Family	Technical Profiles
Organization	Aerospace Federation
Edition	FIRST EDITION
Relationship	Supporting material for AF 9200 - Aerospace Safety & Operational Assurance
Status	Prepared for publisher review; approval and effective dates not assigned
Language	English master text

Use and precedence

The AF 9200 standard contains the proposed requirements. This supporting document supplies guidance, model controls or records within its stated purpose. Complete the local scope, parameters, roles and authority before operational use. A completed template does not establish conformity or permission.

Applicable legal and competent-authority obligations remain independently binding. No AF recognition, accreditation, statutory approval or operational authorization is created by this document. Codes in this set are proposed identifiers for the newly prepared supporting collection.

Record completion

Where fillable fields are provided, use a PDF reader that supports interactive forms. Blank fields remain unresolved. Attach controlled evidence by identifier where space is insufficient. Typed names are not certificate-based digital signatures. Preserve the completed record and its history under the local retention rules.

Implementation control	Allocation
Responsible function	Relevant activity technical authority
Primary AF 9200 anchors	23; Annex K
Catalogue	AF-ML-9200-001; coverage: AF-CM-9200-001

1 Purpose and use

This workbook supports AF 9200 Annexes A-C and the activity modules. Complete it for one defined object and configuration. Every numerical limit, interval or decision rule needs a technical basis and an eligible approver. Blank fields are unresolved; they do not mean N/A. Use a controlled attachment where space is insufficient and record its identifier.

The local profile shall be approved before a dependent release or conformity decision. Informative examples in the standard are not default limits. This workbook does not grant statutory permission or AF recognition. Typed names are recorded identities, not certificate-based digital signatures.

Use this activity supplement together with AF-TP-9200-001. Record the common profile ID, baseline and applicable clause set in the first field. This supplement does not replace the common parameters. A multi-activity object may require more than one supplement.

2 Activity parameters and evidence

Apply when Clause 23 is triggered. Product acceptance, test safety and operational commissioning are separate decisions. Complete criteria before testing and retain adverse results.

Design / manufacturing / test object and retained responsibility

Safety-critical characteristics, materials and qualified processes

Design loads, environments, interfaces and verification criteria

Test safety, facility limits, instrumentation and uncertainty

Anomaly disposition, traceability and affected-population rules

Commissioning, handover and receiving-party assumptions

Technical authority, independent review and approval
